

# Project Guide

## 1-2-3 Pebble Ornaments

Glass Cutting: **none**

Firing: **contour fuse**

These Holiday Ornaments are adorable and kid-friendly!

1 Gather Pebbles™, a 5-inch square piece of Kiln Shelf Paper, a Clear Chip, a small piece of copper wire, and Elmer's glue.

2 Glue Pebbles directly to the shelf paper in the shape of the desired ornament. *All Pebbles must touch* in order to fuse properly.

3 A hanging loop is created by gluing a copper wire between the Clear Chip and an outer Pebble. (After firing, bend the top of the wire into a loop.)

Make sure all Pebbles are touching then fire using a Contour Fuse schedule. We used 1440° for a ten minute hold.

Hang ornaments with metallic or coordinating ribbons to add to the fun.

Trace this circle onto your Kiln Shelf Paper to use as a guide for making the wreath. (Wreath berries are small, nipped pieces of Red Opal Rod nestled on top of completed wreath.)
